STELLENBOSCH, South Africa, 17 Aug 2009

iSee SOFTWARE SOLUTIONS LAUNCHES ITS MOBILE VIDEO STREAMING SOLUTION.

iSee Software Solutions (PTY) Ltd., a recently formed software company providing mobile video solutions, has released "iSee Mobile View", a **mobile video surveillance software package** that allows multiple users to access video cameras using their mobile phones. iSee aims to make its mobile video streaming technology **accessible to "the man in the street" with this easy to use, flexible and affordable software package.**

The system requires a camera(s) connected to a PC with a permanent internet connection and a Java enabled mobile phone. A list of tested mobile phones is available from our website.

The system can be used to view your home, office, business or any location you can think of, from your mobile phone. Capture video is also stored on your PC hard disk for later viewing.

iSee Mobile View comprises of all the expected features associated with a PC based DVR (digital video recorder), plus the added capability of mobile video streaming. The system also allows the user to setup e-mail and text message (SMS) notifications that will deliver notifications upon motion detection.

Pricing and availability

iSee Mobile View is available now and the entry level software package retails at USD 30.00.
